

# St Bernadette Catholic Secondary School

We are proud to be a community of faith and learning at St Bernadette. In **Maths** we believe in celebrating the success of each individual and promoting a collaborative classroom ethos where peers take pride in, and view as important, the need to help one another with their learning. We believe in teaching and praising the perseverance of our pupils and having them view errors as an opportunity to learn.

## **Maths contributes to our learning and faith community by:**

- Equipping our pupils with the mathematical skills required to lead a fulfilled life.
- Having our pupils see that mathematics is a subject which provides marvellous opportunities to hone powers of reasoning and cultivate a sense of wonder at the remarkable order, pattern and relationships inherent in God's world.

*"Growing and learning in faith"*
